

# HOW TO CHOOSE YOUR NEXT STOVE

## Firewood or pellets?

Is it important to you to be able to burn regular wood and see the flames dancing?

NO

YES

24/7

Are you looking for a heat source that can operate 24/7?

YES

NO

Do you want an opportunity to use the stove overnight and ignite it from a distance/ programme the stove?

NO

YES

Choose a wood burning stove

Choose a hybrid stove

Do you want an opportunity to get warm when there is no electricity?

NO

YES

Choose a pellet stove or a hybrid stove, depending on your wishes for the design

Choose an Aduro Hybrid incl Aduro DraftOptimizer, which ensures a stable operation

Choose a pellet stove

### PELLET STOVE

- + Stable operation
- + Option for automatic cleaning
- ÷ Noise from the fan and pellets
- ÷ More extensive cleaning on a weekly/monthly basis

### HYBRID

- + Design with a great view of the flames
- + Quiet
- + Works without electricity
- + Cosy ambience from a beautiful flame
- + Pyrolysis cleaning
- ÷ Requires slight cleaning every day
- ÷ Requires a stable chimney draft

### HYBRID incl. Aduro DraftOptimizer

- + Design with a great view of the flames
- + Quiet
- + Works without electricity
- + Cosy ambience from a beautiful flame
- + Ensures stable operation
- ÷ Requires slight cleaning every day
- ÷ Requires electricity for the smoke exhauster on the chimney

### WOOD burning stove

- + Design with a great view of the flames
- + Cosy ambience from a beautiful flame
- ÷ Manual firing every 2-4 hours
